"Middlesex Community College as a whole provided hope in a seemingly hopeless future. Obtaining my MIS and IS degrees has provided strength and confidence knowing that the tools to succeed and excel were taught. I use the teaching from MxCC to teach, train, and assist coworkers who may not have had the same knowledge that I acquired from MxCC."

Steven DiStefano, MIS Graduate 2015
Help Desk Analyst, Global Help Desk Services, Inc.

Mission & Vision

In all it does, Middlesex Community College strives to be the college of its community. By providing high quality, affordable, and accessible education to a diverse population, the College enhances the strengths of individuals through degree, certificate, and lifelong learning programs that lead to university transfer, career opportunities, and an enriched awareness of our shared responsibilities as global citizens.

About MxCC

At Middlesex Community College you'll get personal attention from dedicated professors in small class settings; guidance from experienced counselors and advisors who will help you clearly define and achieve your goals; programs that will help you launch or build your career in some of today's fastest-growing fields; and, affordable tuition that saves thousands over the average cost of most four-year colleges.

Management Information Systems

The Management Information Systems (MIS) degree program prepares students to become professionals who help organizations to leverage information systems for strategic gains. The MIS degree program at MxCC offers a blend of business, computer, and general education classes that equate to the first two years of a baccalaureate degree program. Students completing their degrees in MIS may continue on to earn four-year degrees or they may pursue an entry-level position in IT.

"Employment of computer and information systems managers is projected to grow 15 percent from 2014 to 2024, much faster than the average for all occupations. Demand for computer and information systems managers will grow as firms increasingly expand their operations to digital platforms. Computer and information systems managers will be responsible for implementing these goals."

- According to the U.S. Bureau of Labor statistics

Experiential Learning Provides Support to the Academic Program

Students at MxCC have many opportunities to engage in experiential learning which gets them involved with technical projects that serve the campus and community. The students in the MIS program participate in service-learning projects that leverage technology to solve actual business problems.

An internship enhances the MIS curriculum and allows students to apply their skills in an on-the-job setting. Students are placed in diverse workplace settings where they function as IT professionals. Local companies that serve as internship sites include a growing list of partners such as: Liberty Bank, Global Help Desk Services, Inc., and APEX Technology Group.

MxCC Computer Club

The **MxCC Computer Club** provides opportunities for its members to share and learn about IT, device repair, and software. The Computer Club's Technology Center on campus offers a wide range of computer services to students, faculty, and staff. Students gain valuable technical expertise by serving as volunteers.

"I thoroughly enjoyed the MIS degree; it has developed me into an extremely well rounded IT professional."

Matthew Pezzente, MIS Graduate 2015
Former Computer Club President
Web Developer, Reach Beyond Marketing Company

Instruction

Classes are taught by industry-qualified, credentialed instructors with a wealth of professional experience. In addition to the traditional classroom instruction, students are given a myriad of opportunities to experience computer technology in ways that foster growth and discovery. We are proud to offer students the chance to enhance their knowledge of business and technology by taking courses that develop skills in programming, management, critical thinking, professional writing, public speaking, and more.

Transfer

The Transfer Articulation Policy (TAP) of the Connecticut State University System supports the seamless transfer of credits to our public four-year institutions. MIS is a transfer-oriented degree.

Employment

Our MIS graduates have found employment in the field and have been hired by companies such as:

- Microsoft Corporation
- Hewlett Packard
- Global Help Desk Services
- Connecticut Education Association
- Reach Beyond Marketing
