PAGE 2: Part I: Evaluation of the learning environment - Management Information Systems Program at MxCC

Q1: The degree allowed me to develop the ability to analyze, develop, and design code through knowledge and comprehension of information systems concepts and skills. (Coding)	Very satisfied, Comments: Although, it was very satisfactory there could be improvements on how the class is taught by professors. Computer programing is a complex language, this sort of language should have a sort of slow to medium learning pace for students who are new to programing. My experience as a student new to this language had me in a bid of anxiety. Not being able to understand the professors clearly especially at the pace they were going.
Q2: The degree allowed me to gain strategic and critical thinking skills through development of the ability to identify, gather, measure summarize, verify, analyze, design, develop and test programs and hardware design. (Critical thinking)	Satisfied, Comments: There were design and testing, it was relatively small because of the fast pace environment. This leaves students with more questions then answers sometimes.
Q3: The degree allowed me to develop the ability to identify and solve unstructured problems in unfamiliar setting and exercise judgment based on facts. (Problem-solving)	Very satisfied, Comments: It allow me to use other methods of thinking (critical or outside the box) to solve problems.
Q4: The degree allowed me to sharpen communication through development of proficiency in oral/written/electronic communication skills and the development of the ability to explain programming concepts and code and related technical issues to others. (Communication skills)	Comments: I struggle in this part, understanding programing concepts, let alone explaining them.
Q5: The degree allowed me to develop leadership skills through the development of the ability to work collaboratively with a diverse team, including organization, control, and assessment of group-based work, and provide leadership when appropriate. (Collaborative skills)	Dissatisfied, Comments: Team building or working in groups was a disaster. There should actually be a class on team building and what it takes to be a team member before other degrees try to use it. Sometimes students did not participate or were never a team player.

Q6: **The degree allowed me to develop the skills to apply current technology, analyze business problems, and design and develop software and solve technical issues. (Analytical Skills)**	Satisfied, Comments: The course did allow me to develop the skills, however, lack of clarity hinder the ability to actually do it.
Q7: **The degree allowed me to develop the skills to communicate using network technologies, access information via internet, and understand information integrity and security issues. (Information and digital literacy)**	Comments: Unfortunately this was minimal, where given today technological climate should have been emphasis more throughout the courses involved in MIS
Q8: **The degree allowed me to gain awareness of legal, regulatory, and ethical issues facing the profession, awareness of information technology and network security, and understanding the methods for creating and managing change in organizations.**	Satisfied

PAGE 3: Part II: Other Comments

Q9: **With what aspects of the Management Information Systems Program are you most satisfied with?**

The actual MIS course, programing both in Java and Logic, Visual Basic Database.

Q10: **With what aspects of the Management Information Systems Program are you least satisfied with?**

The online course, programing be it java or others should be taught in class, complex classes like these need face to face interactions.

Q11: **Do you have any other comments or suggestions?**

More emphasis on the technology part of MIS, more courses or at least a follow-up semester on most programing classes.

PAGE 4: Part III. Demographic Information

Q12: **What is your gender?**	Male
Q13: **What is your age?**	40 or older
Q14: **Which race/ethnicity best describes you? (Please choose only one.)**	Hispanic or Latino
Q15: **In what city/town do you currently live?**	Meriden
Q16: **Which of the following categories best describes your employment status?**	Employed, working full-time

Q17: **Are you currently working in the field of Business or Information Technology (IT)? If so, please state your occupation and primary duties.**

Yes, sort through data and provide quality checks and review current process and provide solutions for more efficiencies.

Q18: When did you graduate from MxCC?	Spring 2016
Q19: How long did it take to complete your MIS degree at MxCC?	6 semesters or more
Q20: In addition to your MIS degree, did you also complete a computer-related certificate at MxCC? Please select the ones that apply.	N/A

Q21: Did you transfer from MxCC to another college or university? If so, please list which one.

Central Connecticut State University

Q22: Besides the Associate's degree in MIS that you earned at MxCC, do you hold any of the following degrees?	*Respondent skipped this question*
Q23: If you have not yet transferred to a 4-year school, do you plan to pursue a bachelor's degree within the next five years?	*Respondent skipped this question*
Q24: Do you have any computer-related certificates? For example, Cisco CCNA.	No

Q25: Why did you choose the Management Information Systems program at MxCC?

Because of my interest in technology and business.

PAGE 2: Part I: Evaluation of the learning environment - Management Information Systems Program at MxCC

Q1: **The degree allowed me to develop the ability to analyze, develop, and design code through knowledge and comprehension of information systems concepts and skills. (Coding)**	Satisfied
Q2: **The degree allowed me to gain strategic and critical thinking skills through development of the ability to identify, gather, measure summarize, verify, analyze, design, develop and test programs and hardware design. (Critical thinking)**	Satisfied
Q3: **The degree allowed me to develop the ability to identify and solve unstructured problems in unfamiliar setting and exercise judgment based on facts. (Problem-solving)**	Satisfied
Q4: **The degree allowed me to sharpen communication through development of proficiency in oral/written/electronic communication skills and the development of the ability to explain programming concepts and code and related technical issues to others. (Communication skills)**	Satisfied
Q5: **The degree allowed me to develop leadership skills through the development of the ability to work collaboratively with a diverse team, including organization, control, and assessment of group-based work, and provide leadership when appropriate. (Collaborative skills)**	Satisfied
Q6: **The degree allowed me to develop the skills to apply current technology, analyze business problems, and design and develop software and solve technical issues. (Analytical Skills)**	Neither satisfied nor dissatisfied
Q7: **The degree allowed me to develop the skills to communicate using network technologies, access information via internet, and understand information integrity and security issues. (Information and digital literacy)**	Satisfied
Q8: **The degree allowed me to gain awareness of legal, regulatory, and ethical issues facing the profession, awareness of information technology and network security, and understanding the methods for creating and managing change in organizations.**	Satisfied

PAGE 3: Part II: Other Comments

Q9: With what aspects of the Management Information Systems Program are you most satisfied with?

The internship program, and the managerial communications classes were some of the best classes I've been apart of, teaching with realistic enivronments.

Q10: With what aspects of the Management Information Systems Program are you least satisfied with?

The programming classes I feel should be updated to be geared toward emerging technologies. When I attended, we used Java to learn basic programming concepts, when maybe doing something with C# or C++, which may provide a better pathway to more dynamic programming languages.

Q11: Do you have any other comments or suggestions?

I would just suggest that curriculum keep up with latest trends, and not fall behind.

PAGE 4: Part III. Demographic Information

Q12: What is your gender?	Male
Q13: What is your age?	21-23
Q14: Which race/ethnicity best describes you? (Please choose only one.)	White / Caucasian
Q15: In what city/town do you currently live?	Orlando
Q16: Which of the following categories best describes your employment status?	Not employed, NOT looking for work
Q17: Are you currently working in the field of Business or Information Technology (IT)? If so, please state your occupation and primary duties.	*Respondent skipped this question*
Q18: When did you graduate from MxCC?	*Respondent skipped this question*
Q19: How long did it take to complete your MIS degree at MxCC?	5 semesters
Q20: In addition to your MIS degree, did you also complete a computer-related certificate at MxCC? Please select the ones that apply.	N/A

Q21: Did you transfer from MxCC to another college or university? If so, please list which one.

Full Sail University

Q22: Besides the Associate's degree in MIS that you earned at MxCC, do you hold any of the following degrees?	*Respondent skipped this question*

Q23: If you have not yet transferred to a 4-year school, do you plan to pursue a bachelor's degree within the next five years?	*Respondent skipped this question*
Q24: Do you have any computer-related certificates? For example, Cisco CCNA.	No

Q25: Why did you choose the Management Information Systems program at MxCC?

I chose MIS because it fit my personality, and what I enjoy doing. I am a social person, and enjoy doing more than just having a desk job programming 24/7. Also, I enjoy using technology to solve people's needs or problems, so MIS was a good fit for me overall.

PAGE 2: Part I: Evaluation of the learning environment - Management Information Systems Program at MxCC

Q1: **The degree allowed me to develop the ability to analyze, develop, and design code through knowledge and comprehension of information systems concepts and skills. (Coding)**	Satisfied, Comments: java I and II were very helpful, also was visual basic
Q2: **The degree allowed me to gain strategic and critical thinking skills through development of the ability to identify, gather, measure summarize, verify, analyze, design, develop and test programs and hardware design. (Critical thinking)**	Very satisfied
Q3: **The degree allowed me to develop the ability to identify and solve unstructured problems in unfamiliar setting and exercise judgment based on facts. (Problem-solving)**	Very satisfied
Q4: **The degree allowed me to sharpen communication through development of proficiency in oral/written/electronic communication skills and the development of the ability to explain programming concepts and code and related technical issues to others. (Communication skills)**	Satisfied
Q5: **The degree allowed me to develop leadership skills through the development of the ability to work collaboratively with a diverse team, including organization, control, and assessment of group-based work, and provide leadership when appropriate. (Collaborative skills)**	Satisfied, Comments: Many group projects! very good
Q6: **The degree allowed me to develop the skills to apply current technology, analyze business problems, and design and develop software and solve technical issues. (Analytical Skills)**	Satisfied, Comments: Prof Hylton taught with very current topics
Q7: **The degree allowed me to develop the skills to communicate using network technologies, access information via internet, and understand information integrity and security issues. (Information and digital literacy)**	Satisfied
Q8: **The degree allowed me to gain awareness of legal, regulatory, and ethical issues facing the profession, awareness of information technology and network security, and understanding the methods for creating and managing change in organizations.**	Neither satisfied nor dissatisfied

PAGE 3: Part II: Other Comments

Q9: With what aspects of the Management Information Systems Program are you most satisfied with?

with developing solutions to ease tasks with the help of IS and other technologic devices; information is key to good decissions.

Q10: With what aspects of the Management Information Systems Program are you least satisfied with?

CCSU requires macro AND micro economics, MxCC only requires one, and so it is for finance and marketing classes. Have the basic classes align a bit more with CCSU. Still an awesome experience and learned a lot of stuff in mxcc

Q11: Do you have any other comments or suggestions?

align it a bit more with CCSU's program, have the student take finance, marketing, and both economics in mxcc, will save a lot of time. Keep the co-op experience!!! it really helps

PAGE 4: Part III. Demographic Information

Q12: What is your gender?	Male
Q13: What is your age?	21-23
Q14: Which race/ethnicity best describes you? (Please choose only one.)	Hispanic or Latino
Q15: In what city/town do you currently live?	meriden
Q16: Which of the following categories best describes your employment status?	Employed, working full-time

Q17: Are you currently working in the field of Business or Information Technology (IT)? If so, please state your occupation and primary duties.

no

Q18: When did you graduate from MxCC?	2016
Q19: How long did it take to complete your MIS degree at MxCC?	6 semesters or more
Q20: In addition to your MIS degree, did you also complete a computer-related certificate at MxCC? Please select the ones that apply.	N/A

Q21: Did you transfer from MxCC to another college or university? If so, please list which one.

ccsu

Q22: Besides the Associate's degree in MIS that you earned at MxCC, do you hold any of the following degrees?	*Respondent skipped this question*

Q23: If you have not yet transferred to a 4-year school, do you plan to pursue a bachelor's degree within the next five years?	*Respondent skipped this question*
Q24: Do you have any computer-related certificates? For example, Cisco CCNA.	No

Q25: Why did you choose the Management Information Systems program at MxCC?

because it helped me understand how I could manage IS to help achieve tasks better and more efficiently
