Mathematics Division
offers
Emporium Calculus!

A new approach to learning Calculus!

At the end of the course, you will say ...

In this course, we will ...

- Balance concepts with practice
- Learn by doing
- Get everyday assistance in lab setting

Details: In Fall 2013, Calculus II (MAT*256) and Calculus III (MAT*268) are offered using an emporium model. Students from both courses will meet at the same time. There will be separate group instruction for each subject during part of the class time. For the remaining class time the students work in a computer lab on online exercises while individualized assistance is provided.

For more details, contact Dr. Rayappan at (860) 343-5791 or mrayappan@mxcc.edu or a Math faculty member.
