

Urgent Need for Biology Adjuncts

We are looking for adjunct faculty to teach 100-level Biology courses. The BIO*121 course is an introductory cell biology course while BIO*122 is an organismal biology course. These courses transfer to 4-year institutions as the first-year biology sequence for science/Biology majors. Applicants must have a Masters or PhD in Biology or a discipline that complements the course content. Each course entails approximately 3h of lecture and 3h of laboratory per week. Spring sections have been scheduled but are still in need of staffing. These are day classes.

BIO*121 General Biology I	<ul style="list-style-type: none">• Master's Degree in Biology or Cell/Neuro/Molecular biology WITH 18 graduate credits in these disciplines AND must be current in the laboratory skills required of their field
BIO*122 General Biology II	<ul style="list-style-type: none">• Master's Degree in Biology WITH 18 graduate credits to include ecology, and organismal and evolutionary biology• AND must be current in the laboratory skills required of their field
