

## Did you place into MAT\*085 or MAT\*095?

### Take a **MATH Fast Track Workshop**

The Math Fast Track Workshop (non-credit) could help you raise your math course placement.

You are eligible if you are a student who:

- did not place into a college-level math course (Mat\*137 or above)
- did not do well in Mat\*085 and need to repeat the course

The **FREE** 10 day workshop covers topics ranging from arithmetic to elementary algebra.

The course is structured as a combination of lecture, group work, and self-paced online tutorial videos and practice sets. Dedication outside the classroom is also required in order to achieve maximum results. Students who attend regularly will be given the opportunity to re-take the Accuplacer placement test at the end of the workshop. Our goal is to enable you to begin your sequence of required math courses for your academic program at a higher level, reduce the use of financial aid for remedial courses, and graduate in a timely manner.
