Introduction

Middlesex Community College's Radiologic Technology program is designed to prepare students for entry level employment as Radiographers in hospitals, clinics, and medical offices. The program emphasizes that quality patient care will be provided by individuals who have received instruction based on educational and instructional guidelines consistent with the profession.

Middlesex Community College Mission

In all it does, Middlesex Community College strives to be the college of its community. By providing high quality, affordable, and accessible education to a diverse population, the college enhances the strengths of individuals through degree, certificate, and lifelong learning programs that lead to university transfer, employment, and an enriched awareness of our shared responsibilities as global citizens.

Accessibility & Disability Services

Middlesex Community College is committed to equal access for persons with disabilities. Academic adjustments are provided to students with disabilities to assure equivalent access to academic and campus programs. For more information about academic adjustments and how to request them, please contact Ms. Hilary Phelps, Disability Support Services Coordinator (office: Founders Hall room 121; phone: 860-343-5879; email: hphelps@mxcc.edu). Ms. Phelps works with students to discuss individual requests, review the type of adjustments and services that MxCC will provide, and inform them about any documentation that may be necessary to arrange for certain adjustments. Students with disabilities are encouraged to contact Ms. Phelps at least one month before classes begin to avoid any delay in providing academic adjustments, especially when the college must arrange for external resources to provide the adjustments. Please also note that academic adjustments cannot be given retroactively. For further information, please visit www.mxcc.edu/disability-services.

Program Information

Middlesex Community College School of Radiologic Technology is a full-time, 22-month program for students interested in a career in Radiography. The program accepts and starts a new class during the fall semester each year. Enrollment in the program is restricted by limited clinical facilities and strict JRCERT clinical capacity requirements.

Following the successful completion of all Program requirements and obligations to the college, students are awarded an Associate of Science – Radiologic Technology Degree and may sit for the national certification examination administered by the American Registry of Radiologic Technologists. Successful completion of the national certification examination with a minimum score of 75 is necessary for application to the State of Connecticut for licensing purposes as a Radiographer.

The program adheres to MXCC Student and Faculty Non-Discrimination policies in that there is no discrimination of student or faculty on the basis of race, color, national or ethnic origin, religion, age, sex, marital or veteran status, sexual orientation, physical disability, or any other legally protected status. Our graduates are allied health professionals who operate imaging equipment to obtain diagnostic radiographs for every part of the body. Employment opportunities include education, sub-specialization, sales and applications, and administration.

Accreditation

The Middlesex Community College School of Radiologic Technology is accredited by The Joint Review Committee on Education in Radiologic Technology (JRCERT) and authorized by the Connecticut Board of Regents.

The Joint Review Committee on Education in Radiologic Technology
20 North Wacker Drive, Suite 2850
Chicago, IL 60606-3182
(312) 704-5300
www.jrcert.org

The JRCERT Standards for an Accredited Program in Radiologic Sciences may be found at www.jrcert.org/programs-faculty/jrcert-standards/

Advisement

Questions regarding Program advisement should be directed to:

Judy Wallace
Professor of Biology/Anatomy & Physiology
Coordinator, Radiologic Technology Program
(860) 343-5780
jwallace@mxcc.edu

Office Location: Wheaton Hall, room 209

Educational Advancement

The Radiologic Technology Program supports the educational advancement of its graduates. Middlesex Community College offers post-primary certification programs in Computed Tomography and Mammography. To learn more about these exciting opportunities and the admissions process for both, please visit our website: <http://mxcc.edu/future-students/selective-admissions/>.

Application Process

Radiologic Technology is a selective admissions program. All application materials (including all final official transcripts) must be sent to the Office of Admissions at Middlesex Community College no later than March 31, 2017. *Late applications and transcripts will not be accepted.*

All applicants are required to submit the following by the March 31, 2017 deadline:

- ✓ **General Middlesex Community College application** with \$20 application fee.
- ✓ **Signed and completed Radiologic Technology Application.** The application is available online at <http://mxcc.edu/future-students/selective-admissions/> or may be picked up at the Admissions Office (Founders Hall).
- ✓ **Proof of high school completion.** This may be done by submitting an official high school transcript or a photocopy of your high school diploma or **GED certificate**.
- ✓ **Official college or university transcripts** from all colleges ever attended. If you have completed courses at Middlesex Community College you do not need to submit a Middlesex transcript.
 - **Minimum 2.7 Rad Tech GPA-** based only on the college courses with grades that meet the admission requirements and curriculum requirements of the Radiologic Technology Program. The Rad Tech GPA is a program-specific calculation and may differ from your college GPA. *(Please note: if an applicant is using a course from a Fresh Start Semester to meet a Rad Tech admission or program curriculum requirement, that course will count in the calculation of the applicant's Rad Tech GPA.)*
 - Completion of BIO*211 (Anatomy and Physiology I) or equivalent, **with a grade of C+ or higher**, completed within five years prior+ to application deadline of March 31, 2017.
 - Completion of BIO*212 (Anatomy and Physiology II) or equivalent, **with a grade of C+ or higher**, completed within five years prior+ to application deadline of March 31, 2017 or completed during, but no later, than the spring semester of application year.
 - Completion of **ENG*101** (English Composition) or equivalent with a grade of C or better by the application deadline of March 31, 2017.
 - **Computer literacy.** This requires a passing score on a computer proficiency test or completion of CSA*105, CSA*106 or CSC*101 or equivalent with a grade "C" or higher, completed prior to the application deadline of March 31, 2017.

+ "Five years prior" is defined as having completed the course between December 2011 and March 31, 2017.
- ✓ **Three letters of recommendation.** Letters should be from former or current employers or professors. All letters should be submitted on school or company letterhead and should include the applicant's full name within the letter & **must be submitted in a sealed envelope with the recommender's signature across the seal.** Please note: **NO** peer or hand-written letters of recommendation will be considered.
- ✓ **One page personal statement:**
 - Must address the following topics:
 - Brief biography
 - Reason(s) for interest in the Radiologic Technology field
 - Reflection on the applicant's observation experience.
 - The personal statement should be submitted Times New Roman 12 pt. font and signed.
 - **Hand-written essays will not be accepted.**
- ✓ **Written documentation of having spent time observing radiographers in their professional setting.** To arrange an observation at Middlesex Hospital, please contact Donna Crum (before February 2017) at donna.crum@midhosp.org. To complete an observation at another facility, the Observation Form must be completed by the contact person at that facility.

- ✓ **Mid-term grade report.** Students taking college courses during the spring 2017 semester must have their mid-term grades sent before the March 31, 2017 deadline. Please see page eight for the mid-term grade report form.
- ✓ **Immunization Records**
 - This includes documentation for Measles, Mumps, Rubella (MMR) and Varicella (chicken pox). Certain exemptions may apply. For example, students born on or before December 31, 1956 are exempt from the MMR requirement only. Students born in the United States before January 1, 1980 are exempt from the varicella requirement only.
 - Students must also have a 2 step – Tuberculosis test record documentation within 1 year of the start of the program.
 - Clinical sites also require a non-reactive PPD test (Mantoux not more than one year old) and flu shot of all students. Additional immunizations may apply and will be shared with students at the time of their acceptance into the program.

All transcripts must be final transcripts. Students taking courses in the fall or winter semester must submit transcripts that include their fall & winter grades. ***All transcripts (including those with course withdrawals, course failures, and remedial/developmental courses) must be submitted regardless of the age of the transcripts and applicability to the Radiologic Technology program. This includes any college credits earned while in high school.***

Interview Process

After the application deadline has passed, the Radiologic Technology Program Review Committee will review all applications to determine if the applicant is eligible for consideration. Eligible applicants will be contacted by the Office of Admissions if selected for an interview. Not all eligible applicants will be contacted for an interview.

Selection Process

Each year, all applications will be reviewed and approximately select eligible candidates will be contacted for an interview.

Candidates will then be evaluated by the interview committee. Up to twenty-four (24) candidates along with a minimum of four alternates are submitted for background checks. Based on the outcome of the background checks, up to twenty-four candidates will be invited to join the program. Applicants that are not chosen for admission are encouraged to apply for the next academic year.

The alternates are considered to be on the Program waitlist for the incoming fall cohort for that year. If an opening becomes available, before the start of classes, applicants will be selected (in rank order) from the waitlist and offered a spot in the Program. Applicants who refuse a spot in the Program will be removed from consideration. The waitlist will be dissolved upon the start of the fall semester.

The waitlist will not carry over from year to year. Applicants who are not selected from the waitlist will need to submit a new application if they want to be considered for admission to the Radiologic Technology program the following year. Several Radiologic Technology related application credentials will need to be resubmitted, including the essay/biography and three (updated) letters of recommendation. You must also complete another observation session and submit the appropriate documentation as required by the application process. Please review the college website for any updates regarding the admissions guidelines and process. Applicants may contact the Office of Admissions at (860) 343-5719 or by email (MX-AdmissionsHelp@mxcc.edu) to see what general application information is still on file.

The program starts in the fall semester each year. Decisions will be available on or around mid-May each year.

MXCC Radiologic Technology Program of Study

The program of study reflects a full-time curriculum plan that matriculated students enrolled in the radiologic technology program are required to complete before graduation. Many students complete most of the general education courses before applying to the program. Non-radiology courses must be taken no later than the semester listed in the plan of study but may be taken earlier; radiology courses must be taken in the stated sequence. RAD* courses scheduled for the summer session are mandatory courses toward the completion of the radiologic technology professional curriculum.

Students must earn a “C” or higher in all RAD* designated and program courses with the exception of BIO*211 and BIO*212 which is a C+ or higher. Students who fail to complete required courses or meet the minimum grade requirement may be dismissed from the program. There may be pre-requisite courses that must be successfully completed prior to taking listed courses. *It is the responsibility of the students to know and meet all requirements for graduation.*

Program Admission and Pre-requisite Courses (11 Credits)

ADMISSION REQUIREMENTS

ENG*101: English Composition (3 credits) with a “C” or better

BIO*211: Anatomy & Physiology I (4 credits) with a “C+” or better taken within the past 5 years.

Computer literacy. This requires a passing score on a computer proficiency test, or completion of CCC CSA*105, CSA*106 or CSC*101 or equivalent with a grade “C” or higher, completed prior to the application deadline.

PRE-REQUISITE REQUIREMENTS

BIO*212: Anatomy & Physiology II (4 credits) with a “C+” or better taken within the past 5 years but no later than the spring semester of application year.

Semester 1, Fall (16 credits)		Credits
PHY*110	Introductory Physics	4
MED*125	Medical Terminology	3
RAD*105	Radiographic Anatomy & Procedures I	3
RAD*109	Methods of Patient Care I	1
RAD*171	Radiographic Clinical Practicum I	2
MAT*137	Intermediate Algebra	3

Semester 2, Spring (14 credits)		Credits
PSY*III	General Psychology I	3
RAD*209	Methods of Patient Care II	3
RAD*172	Radiographic Clinical Practicum II	2
RAD*219	Radiographic Equipment and Image Production	3
RAD*204	Radiographic Anatomy & Procedures II	3

Summer Session (7 credits)		Credits
RAD*240	Radiographic Clinical Practicum III	4
RAD*200	Radiologic Physics & Diagnostic Imaging Modalities	3

Semester 3, Fall (15 credits)		Credits
	Elective: Humanities or Fine Arts	3
RAD*222	Radiobiology and Protection	3
RAD*215	Radiographic Pathology	3
RAD*206	Quality Assurance	3
RAD*241	Radiographic Clinical Practicum IV	3

Semester 4, Spring (6 credits)		Credits
RAD*271	Advanced Clinical Internship	6

Total Program Credits: **69 credits** (general education credits - 27 credits; RAD* credits - 42 credits)

**Middlesex Community College/Middlesex Hospital
Radiologic Technology Program**

Mid-term grade report

Students taking college courses at any institution during the spring 2017 semester are required to submit mid-term grades. Please bring this form to your current instructor/s and have each instructor sign the form and indicate your current grade. Please note: instructors must provide a letter grade (a range of grades is acceptable, for example: "A-/B+"). If you have any questions, please call the Office of Admissions at (860) 343-5719.

Middlesex Hospital – School of Radiologic Technology Academic Observer Policy

Purpose: Prospective radiography students are required to do a minimum of a two (2) hour observation in a radiology department prior to program admission. The requirements for persons to observe the operations of the radiology department, including direct observation of patient care.

Scope: Radiology department at a hospital.

Definition of Terms:

The term ACADEMIC OBSERVER refers to any non-paid, visiting person, at least 15 years of age, from a recognized college, university, or high school, who is assigned to a specific radiography program student or radiology department staff member by the School of Radiologic Technology clinical coordinator to observe clinical operations of the Radiology Department for radiography program purposes.

The assigned radiograph program student or radiology department staff member will be responsible for the observer and ensure compliance with Hospital policies and procedures.

Process:

Students who have completed the School of Radiologic Technology Observation Form and spoken with the School of Radiologic Technology clinical coordinator will *observe* patient care under the direct supervision of a radiography student or radiology department staff member. Such individuals are subject to the requirements and responsibilities for academic observing in accordance with this policy. Any person wishing to be an observer must notify the School of Radiologic Technology within a minimum of five (5) business days before planned observation. Due to the risks associated with certain hospital environments, observers are *not* permitted in the Operating Room or Critical Care Unit.

The requirements to be a School of Radiologic Technology academic observer are described below, broken out by School of Radiologic Technology and observer responsibilities.

School of Radiologic Technology Responsibilities:

- When accepting a student to observe, the School of Radiologic Technology must receive and review the completed School of Radiologic Technology Academic Observation Form to the School of Radiologic Technology Clinical Coordinator at least five (5) days prior to the student's observation.
- Ensure that the student has completed all required paperwork. On the day of observation, all observers must obtain an observer badge, which can be picked up by the observer in the School of Radiologic Technology clinical coordinator's office. Any observer not in compliance with these requirements should be directed to the radiography program director before observation or sent home.
- For any patient observation, a verbal consent from the patient or surrogate is required before entering the room with the observer. Upon refusal in either instance, the observer must not enter the room under any circumstance.
- Ensure that the observer does not engage in any of the following activities:
 - Speaking with patients unless invited
 - Examining patients
 - Writing in or accessing patient charts
 - Advising clinicians or the patient regarding medical care or treatment
 - Participating in patient care in any manner

- Provide the student with guidance as to appropriate behavior and attire. The student is expected to wear business casual clothing and he/she is not permitted to wear open-toed shoes, tank/tube tops, t-shirts, jeans, cutoffs, shorts, sweats, perfume/cologne, dangling or inappropriate jewelry. Students with such attire will be sent home.
- Confirm that the observer has left any personal electronic devices capable of video, photography, or communication at home or inside their vehicle.
- Arrange the date and time with the academic observer at least five (5) days prior to observation.
- Provide a brief orientation to the Hospital's safety standards, infection control procedures, and HIPAA privacy concerns. All students will be given acknowledgement forms with more details about each policy and should have a basic understanding before arriving at the Hospital. Any non-compliance with such policies should be referred to the School of Radiologic Technology clinical coordinator and the observer should be sent home.
- Instruct observer to return his/her badge and sign out at the end of the observation with the School of Radiologic Technology Clinical Coordinator. If observing at a Middlesex Hospital satellite facility, the badge may be returned to School of Radiologic Technology clinical instructor before leaving the satellite facility. The observer will follow the outline procedure for the specific hospital they have gained the opportunity to observe.

Observer Responsibilities:

- Observer will complete the School of Radiologic Technology Observation Form (if observing at a Middlesex Hospital site), which can be downloaded from the college webpage, and he/she must file a completed copy with the School of Radiologic Technology clinical coordinator at least five (5) days prior to the requested observation date.
- Observer understands that he/she will not be provided with liability or medical insurance nor qualify for workers compensation benefits if injured during the course of the observership. Observer will provide documentation that he/she has health insurance coverage which is valid in the United States.
- Observer will not provide medical care to patients which includes but not limited to performing the following functions: Take a medical history, perform physical examination, diagnose and treat a patient's condition, prescribe and administer drugs, write notes or orders in patient's chart, perform and assist in a procedure, bill for services rendered. Observer acknowledges that providing medical care to patients in violation of this agreement.
- Observer understands that he/she must be accompanied by their assigned radiography program student or radiology department staff member when observing patient care activities. Observer has no independent access to patients or to patient records (electronic or hard-copy).
- Observer must wear a temporary ID badge with an "***Academic Observer***" label and must return the temporary badge to the School of Radiologic Technology clinical coordinator or the clinical instructor if at a Middlesex off-site.
- Observer will provide documentation of current (within one (1) year of request for observation) basic immunization records to include: Rubella, Rubeola (measles), Mumps, Varicella (chicken pox), Tuberculosis (2 step), and Hepatitis B (optional).
- Observer agrees to refrain from patient care observation at any time observer has an infectious disease or condition that could be transmitted to patients.
- Observer, at Middlesex Hospital, will watch an orientation video.

- Observer will not disclose or discuss patient identifiable information with any persons except in accordance with applicable law, Hospital policies and with the approval of other healthcare providers involved in the patient’s care as needed to facilitate the observership experience.
- Observer assumes all costs incurred during observation hours, including meals, parking, etc.
- Observers are expected to dress appropriate business casual and are not permitted to wear open-toed shoes/high heels, tank/tube tops, t-shirts, jeans, cutoffs, shorts, sweats, perfume/cologne, dangling or inappropriate jewelry (ear rings or necklaces, visible body piercings). Students with such attire should be sent home.
- Observer is not permitted to carry any personal electronic devices capable of video, photography, or communication. All such devices should be left at home or in their vehicle.
- Observer releases Middlesex Hospital and its affiliates, trustees, officers, employees and agents from any responsibility or liability for personal injury, including death, and damage to or loss property that Observer may incur due to negligence of the Hospital and its affiliates, trustees, officers, employees and agents arising while Observer is in the Hospital.

I will follow the Middlesex Community College School of Radiologic Technology Academic Observer Policy.

Program Mission Statement

The Middlesex Community College Radiologic Technology Program is dedicated to educating and training students to become certified, professional, and competent technologists in the field of Radiologic Sciences.

The mission statement is realized through the attainment of the following goals:

1. Students will be clinically competent.
2. Students will use critical thinking skills in both routine and non-routine clinical situations.
3. Students will demonstrate professional behaviors.
4. Students will communicate effectively.

Student Learning Outcomes

1. Students will correctly apply positioning skills for routine patient procedures.
2. Students will make necessary adjustments in positioning for non-routine patient procedures.
3. Students will select appropriate technical factors for routine patient procedures.
4. Students will modify technical factors for non-routine patient procedures.
5. Students will practice radiation safety.
6. Students will use effective oral communication skills.
7. Students will practice written communication skills.
8. Students will demonstrate professional behaviors.

In addition to the above mentioned goals and student learning outcomes, benchmarks formulated to indicate Program effectiveness include:

- A first attempt ARRT credentialing exam pass rate of 100%
- Annual Exit Survey Evaluation Average of 90% for student satisfaction with their education
- Annual Employer Satisfaction Survey Average of 2.0 on a 3.0 scale for employer satisfaction with graduate's performance
- A five year average job placement rate within 12 months of Program completion of $\geq 80\%$ (Effective 2014)

The Program's mission is achieved when the graduate has successfully completed and achieved all Program Goals and Outcomes. The program mission complements the missions and values of our affiliate sites.

Program Effectiveness Data

Year	# of Graduates	Program Completion Rate %	ARRT 1st Attempt Pass Rate	Class Average	Connecticut Average	Employment Rate (6 months post-graduation*)
2005	16	84%	100%	90.7	86.1	100%
2006	14	88%	100%	89.6	86.2	100%
2007	17	94%	100%	87.8	85.1	100%
2008	12	71%	92%	86	86.2	100%
2009	15	83%	100%	88.1	86.8	100%
2010	13	81%	100%	90.3	86.3	100%
2011	12	75%	100%	88.7	86.3	100%
2012	8	43%	100%	87.4	85.3	100%
2013	17	89%	100%	84.3	84.1	100%
2014	18	95%	94%	86.4	n/a	100%
2015	13	87%	85%	83.6	n/a	100%

** Employment rate is defined as the number of graduates employed in the radiologic sciences compared to the number of graduates actively seeking employment in the radiologic sciences.*

Technical Standards

Technical standards are the physical, cognitive, and emotional skills required to successfully complete the program and perform the functions of a radiographer. If selected, applicants will be required to undergo a physical exam and submit documentation that the accepted candidate can meet these requirements or provide reasonable adjustments.

- 1. Motor Skills:** The student must possess sufficient motor capabilities to execute the movements and skills required to safely perform the functions of a radiographer. These include, but are not limited to:
 - Standing and walking without support are required up to 100% of the time while assigned to the clinical setting,
 - Must be able to squat and rise without assistance,
 - Reach up to six feet off the floor,
 - Perform physically strenuous tasks to include raising patients in bed, moving, transporting, lifting, or transferring patients to/from tables, stretchers, beds or wheel chairs,
 - Manipulate, move, and adjust various equipment,
 - Perform all physical requirements with sufficient speed and accuracy while upholding established standards of procedure quality and patient safety.

- 2. Sensory Ability:** The student must possess the ability to obtain information in the classroom, laboratory, or clinical settings through observation, auscultation, palpation and other measures, including but not limited to:
 - Visual Acuity**
 - Correctable near vision 20/40 in both eyes,
 - Correctable far vision 20/40 in both eyes,
 - Ability to use computer terminals, other digital equipment, and various technological controls,
 - Ability to monitor a patient and equipment during procedures,
 - Ability to assess computerized/radiographic images,
 - Ability to interpret and access the environment.
 - Hearing**
 - Correctable hearing to pass a whisper test at 10 feet,
 - Ability to hear audible signs of patient distress, equipment operation/malfunction, overhead announcements, and safety warnings.

- 3. Communication Ability:** The student must be able to effectively communicate with peers, faculty, clients and their families, and other health care providers. This includes but is not limited to:
 - Ability to read at a competency level that allows one to safely carry out the essential functions of an assignment (examples: hand written chart data, printed policy and procedures manual),
 - Ability to effectively interpret and process information,
 - Effective verbal and written communication with clients and their families, and other health care professionals,
 - Effective verbal communication to provide optimal customer service, obtain accurate clinical history information, and direct patients during radiographic procedures,
 - Literacy sufficient to access information and to document and communicate effectively via computer.

4. **Behavior:** The student must be capable of exercising good judgment, and tolerating close and direct physical contact with a diverse population. This includes but is not limited to:
- The ability to foster and maintain cooperative and collegial relationships with classmates, instructors, other health care providers, clients and their families,
 - The ability to multi-task, handle stressful situations, and adequately respond to urgent client care and emergency situations,
 - To treat all clients and their families with maximum respect, empathy, and dignity.
5. **Critical Thinking:** The student must possess sufficient abilities in the areas of calculation, critical problem solving, reasoning, and judgment to be able to comprehend and process information within a reasonable time frame as determined by the faculty and the profession. The student must be able to prioritize, organize and attend to tasks and responsibilities efficiently. This includes but is not limited to:
- Conceptualize human anatomy in three dimensions,
 - Ability to collect, interpret, and analyze written, verbal, and observed data,
 - Utilize basic mathematical concepts and arithmetic formula to perform exposure factor calculations and other technical problems related to radiographic image quality,
 - Ability to prioritize multiple tasks, integrate information and make appropriate decisions,
 - Ability to act safely and ethically in the clinical college laboratory and in all clinical environments,
 - Understand and apply didactic theory of radiographic principles to their respective clinical applications.

IMPORTANT INFORMATION FOR STUDENTS ACCEPTED INTO THE RADIOLOGIC TECHNOLOGY PROGRAM

CLINICAL SITES

Clinical learning experiences are planned as an integral part of the program and are held at a variety of healthcare settings, such as hospitals, extended care facilities, and selected community health centers. Students are responsible for arranging their own transportation to and from assigned clinical sites. Clinical experiences may be assigned during daytime, evening, or weekend hours. Assignment of clinical sites is at the discretion of the faculty. Clinical sites could be within an hour radius of the college, and may require a mandatory parking fee.

CRIMINAL BACKGROUND CHECKS

Several clinical sites are now requiring that criminal background checks be completed on any students who will be attending a clinical rotation at those facilities. Students who are found guilty of having committed a felony/misdemeanor may be prevented by a facility from participating in clinical experiences at particular clinical sites. If you cannot participate in a clinical rotation at an assigned facility, you may not be able to complete the objectives of the course and of the program.

HEALTH REQUIREMENTS

All Radiologic Technology students must comply with all medical requirements and will be given supplemental information during the interview process.

WAIVER OF LICENSURE GUARANTEE

Upon successful completion of the Associate Degree in Radiologic Technology, the graduate is eligible to take the licensure exam of the American Registry of Radiologic Technologists. Graduation from the Radiologic Technology Program does not guarantee licensure to practice.
