

Blackboard – How to Show/Hide Links in Course Menu

In “default” template, some links in “Course Menu” are hidden such as “Syllabus” and “Course Content”. If you would like to show a link in Course Menu, you will need to use the “Show Link” feature.

If you would like to hide a link, you will use “hide link”. Either “Show Link” or “hide link” needs to be done when Edit Mode is turned on.

1. To show a link in Course Menu, click on the Action icon next to a link. Select Show Link.

2. To hide a link in Course Menu, click on the Action icon next to the link. Select “Hide Link”.  icon next to a link indicates that the link is hidden. After a link in Course Menu is hidden, students will not be able to see link.
